### **DETAILED ACTION**

1. This is responsive to the RCE filed on 18 December 2008.
2. Claims 1 – 3 and 5 – 10 are pending and considered below.

### ***Response to Arguments***

3. Applicant's arguments filed 18 December 2008 have been fully considered but they are not persuasive.

Applicant argues that Kredo's short hand representations are not shorter text messages, in the sense of the present invention, which can be converted into a voice output because they represent symbols rather than text (Applicant's Arguments, page 7, 2nd and 3rd paragraph). First, it is noted that claim 1, for which the arguments are made, does not require that the text message be synthesized into speech or, in other words, be converted to a voice output. A mere displaying of the text message reads on Applicant's "displaying the alternative text message **and/or** converting the alternative text message into speech output at the called party" (emphasis added). Further, the Examiner respectfully disagrees with the assertion that Kredo's short hand representations are only symbols which are not text that can be speech synthesized. Kredo discloses the short hand representations as comprising not only symbols but also acronyms and abbreviations (col. 7, lines 6-8 and col.8, lines 18-20) which are indeed shorter text messages, in the sense of the present invention, and which are able to be converted into a voice output.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 – 3 and 5 – 10 are rejected under 35 U.S.C. 103(a) as put forth in the Final Rejection mailed on 06 November 2008.

***Conclusion***

6. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
